Ajou–SWUFE Financial Mathematics & Engineering Workshop

DATE

Jul 14 (Tue), 2026

VENUE

Ajou University, Dasan Hall #406

Program

Time	Speaker	Title
13:30 – 14:00	**Hyun-Gyoon Kim** (Ajou Univ.)	Diffolio: A diffusion model for multivariate probabilistic financial time-series forecasting and portfolio construction
14:00 – 14:30	**Junkee Jeon** (Kyung Hee Univ.)	Utility Maximization with Singular Controls
14:30 – 15:00	**Jingtang Ma** (SWUFE)	Parisian stopping in Merton's Problems
15:00 – 15:30	**Takwon Kim** (Sungshin Women's Univ.)	The finite-horizon optimal retirement problem with target wealth: Structure of free boundary
15:30 – 15:40	*Coffee Break*	
15:40 – 16:10	**Wenyue Liu** (SWUFE)	Optimal Insurance Contracts with Adverse Selection and Multiple States
16:10 – 16:40	**Minsuk Kwak** (Hankuk Univ. of Foreign Studies)	A Singular Control Model of REIT Management under a Leverage Constraint
16:40 – 17:10	**Jongbong An** (Sungshin Women's Univ.)	Stochastic Portfolio Theory in a Price-Weighted Framework

Organized by Hyeng Keun Koo & Hyun-Gyoon Kim, Department of Financial Engineering, Ajou University
